

ABOUT US

FEIDEC is a company providing services ranging from design to construction and beyond, in the field of civil engineering. It activities cover buildings, public works, institutional and commercial civil engineering, industrial civil engineering and industrial construction.

Our headquarters are located in Limbe in the South West region of Cameroon, but we operate all over the national territory and abroad.

OUR VISION

At FEIDEC, the quality of our work is an important source of pride and, we work relentlessly to increase and improve our skills, in order to establish and maintain a status of expert in the fields of civil and industrial construction. Through the continuous search for excellence and innovation, we aim to become one of the leading SMEs in these fields in Cameroon and the Sub-region.

OUR MISSION

Our mission is to provide our clients with quality services and realisations that meet both the technical, safety and environmental requirements, the regulations in force and their needs, even the most implicit.

OUR VALUES

Excellence

We are constantly looking for efficiency and effectiveness in our services, and to bring together all the elements for the greatest satisfaction of our customers.

Innovation

We seek the most appropriate solutions for each work, in our vision of continuous improvement.

Safety

Safety is a priority to us. It is integrated at all levels of our processes, whether internally in the organisation and work environment or externally in the execution of our studies and constructions. We master and implement the most demanding standards and best practices.

Quality

Meeting the explicit and implicit needs of our clients is an essential objective for us. Thanks to our active listening to the customer, deep study of the environment and innovation, your satisfaction will be guaranteed.

Sustainability

Protecting the environment, saving energy and natural resources are integrated in our approach from start to finish. For this reason, we focus as much as possible on ecological construction, using local materials.

Integrity

Earning the trust of our partners, our clients and the institutions is one of our priorities. We strive to uphold a high level of integrity and transparency.

Humanity

We believe that the human resource is the most important resource of any organisation. In this regard, we treat our employees with the respect and consideration they deserve.

OUR SERVICES

FEIDEC relies on its teams and partners to provide services of outstanding quality in several branches of civil engineering:

BUILDINGS

From small single-storey houses to huge multi-storey buildings, duplexes and triplexes, we bring our expertise to meet your expectations in the following aspects:

- Architectural design -
- Structural design
- Technical work packages design (electricity, plumbing, HVAC, etc.)
- Detailed cost and materials estimate (equipment, materials and labour) _
- Construction
- Control -
- Maintenance
- Rehabilitation
- Consulting

A turnkey project can be carried out upon the client's request.

PUBLIC WORKS

Public infrastructure (roads, bridges, viaducts, stations, airports, ports, etc.) are essential to the development of a country. FEIDEC's ambition is to contribute to the development of the country and the Sub-region by offering guality services ranging from engineering and project management to construction and post-construction maintenance.

INSTITUTIONAL AND COMMERCIAL CIVIL ENGINEERING

Buildings and premises intended for institutions (banks, hospitals, administrative services, universities, schools, laboratories, libraries, other establishments open to the public, etc.), business (markets, supermarkets, hotels, restaurants) or logistics (warehouses, shops, etc.), should meet specific requirements related to safety, hygiene, functionality, durability, quality and/or environmental protection, depending on the case. FEIDEC's aim is to become one of the experts and a reference in this field by providing you with tailor-made services. Design, engineering, construction and maintenance.

INDUSTRIAL CIVIL ENGINEERING

In the industry sector, especially in the primary and secondary, there is a strong need for special services such as soil preparation, construction of foundations, concrete massifs and other supports for industrial equipment of various sizes, as well as the construction of tracks, concrete areas, channels, bridges, hydraulic structures, and more.

Also, buildings, technical premises, rooms and workshops intended for specific industries such as food processing, livestock, slaughterhouses, pharmaceuticals, cosmetics, chemicals, classified establishments, and more..., have special requirements in terms of safety, security, hygiene, functionality, guality and/or resistance.

The demand for expertise in this specific field is very important in Cameroon and in the Sub-region, which aims at a fast development of its industry. FEIDEC's ambition is to position itself as one of the providers of Industrial Civil Engineering solutions, in order to support the development of the industrial sector in Cameroon and in the Sub-region.

INDUSTRIAL CONSTRUCTION

The construction of an industrial installation requires a specific expertise due to the specific requirements set by the industrial codes and standards, the national and international norms and regulations in the field.

Given the strong need for this expertise due to the need to quickly develop the industrial sector in Cameroon and the Sub-region in the current context, FEIDEC aims to position itself as one of the best solutions providers through its expertise and its network of partners.

INNOVATION

FEIDEC provides you with the most recent tools in order to optimize a large number of construction-related operations.

- VDC (Virtual Design and Construction) : by using 3D, 4D and 5D BIM (Building Information Modeling), we can optimise operations throughout the entire life cycle of the project and the work carried out, in order to save time, ensure quality and functionality, and limit the costs related to rework, errors and additional work. This technology also provides complete, highly accurate and reliable data and documents on the work carried out.
- Laser scanning : we scan existing buildings or existing (physical) plans to obtain data that can be saved and used for reproduction, modification or maintenance.

SPECIAL MATERIALS AND EQUIPMENT

Depending on your project, we can provide you with special, innovative materials and equipment that will help you achieve your goals and ensure your satisfaction.
